RESPONSIBLE DEPARTMENT: Customer Relations

ACCOUNTABLE: Manager of Public Relations

Understanding that irrigation services need to be test-operated on occasion, an irrigator may request that the demand charge, less \$2.00 per kW, associated with a well test, of two hours or less, be adjusted off that well account. A write-off during peak hours, of two hours or less, when also operated during off-peak hours, may be considered with accompanying proof of repair (such as an invoice) by a third party. The timeframe will be confirmed by the month's kWh and demand meter reading.
